PROFILE

Mobile engineer with a full stack background, shipping **cross-platform and native apps** with **React Native**, **SwiftUI** and **Jetpack Compose** across fintech, marketplace, logistics and navigation products, and comfortable owning work **end to end** into NestJS, Django and Next.js services.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Swift, Kotlin, Dart, Python

Mobile: React Native, Expo, SwiftUI, Jetpack Compose, Flutter, CarPlay, Mapbox Navigation SDK

Backend & Web: NestJS, Django, Next.js, Redis, RabbitMQ, REST APIs, Redux, Zustand, React Query

Tools & Platforms: AWS, Azure, Docker, Git, Jest, Postman, Linux, Jira, Spark

EXPERIENCE

DriveToPass | Mobile Engineer

Remote | 03/2026 – Present

SwiftUI, Kotlin, Jetpack Compose, Mapbox Navigation SDK, CarPlay

- Developed a **UK driving test app across iOS and Android**, supporting navigation, driving sessions, and test preparation workflows
- Built the iOS experience with **SwiftUI** and integrated the **Mapbox Navigation SDK** for real-time turn-by-turn navigation
- Developed the Android application using **Kotlin and Jetpack Compose** with native platform integrations
- Implemented **CarPlay integration** to extend the navigation experience to compatible in-car displays

QuickCheck | Mobile Engineer (Software Engineer)

Remote | 10/2025 – Present

React Native, Django, TypeScript, Python, Redux, Android

- Contributed to user **liveliness checks**, helping unblock approximately **70% of users** during verification flows
- Developed backend features for **bill payments** in Django, including admin tooling and discount management
- Refactored parts of the React Native codebase to improve **reusability, maintainability, and performance**
- Collaborated across mobile and backend teams to deliver **production-ready financial features**

CourierDock | Mobile Full Stack Developer

Remote | 07/2025 – 08/2026

React Native, Expo, Zustand, Redis, RabbitMQ, NestJS

- Built CourierDock, a **cross-platform delivery app** in React Native and Expo, covering order tracking, dispatch, and delivery confirmation flows
- Implemented state management with **Zustand** to keep the app lightweight and predictable across delivery, courier, and admin views
- Introduced **Redis caching** to speed up frequently accessed data such as live order status and courier availability
- Used **RabbitMQ** to power the queueing system, ensuring reliable delivery of order and notification events

AutoTout | Full Stack Mobile Developer

Remote | 01/2025 – 01/2026

Next.js, React Native, Expo, TypeScript, React Query, Redis

- Built and maintained AutoTout, a **vehicle marketplace platform**, working across mobile, frontend and backend
- Developed the mobile app with React Native and Expo, using **React Query** for data fetching, caching, and state synchronization
- Built the **admin dashboard** and backend services with Next.js, enabling staff to manage listings, sellers, and transactions
- Implemented **Redis caching** to reduce database load and improve API response times across high-traffic endpoints
- Integrated third-party services powering **listings, payments, and identity verification**

EDUCATION

University of Ilorin, Nigeria — B.S. in Physics, **CGPA 3.94**

2018 – 2023
